## 700 BAR PRESSURE TEST UNIT

---

PT-700

### 700 BAR PRESSURE TEST UNIT

AWG Subsea's single outlet pressure test unit has been designed and manufactured to offer our customers a compact air driven test pump system.

The PT-700 unit has been built for testing applications at optimum output of 690 bar (10,000 psi).

#### Technical data

|                              | PT-700                               |
|------------------------------|--------------------------------------|
| Pump                         | ASL 100-01 Air Driven Unit           |
| Max Pump Output              | 850 bar (12,320 psi)                 |
| Displacement                 | 1.2ltr/min @ 200 bar                 |
| Max Air Consumption          | 64 SCFM                              |
| Outlet                       | 3/8" MP Female or 6 JIC Male fitting |
| Air Inlet                    | 1/2" NPT Female                      |
| Relief Valve                 | Client to confirm set pressure       |
| Overall Tool Dimensions (mm) | 450 x 450 x 530                      |
| Tool Weight                  | Dry 35 kg                            |
| Reservoir                    | 20 ltr                               |
