

HOSE FLUSHING MACHINES

FEATURES & BENEFITS

FLUID TRANSFER TECHNOLOGY

Quality pumps

- Fastest flow rates for lean production
- Test Pressures up to 15,000psi
- Optimum flow rates for large flow lines and umbilicals

Superior design features

- Easy and faster to operate
- Cleanliness standards to NAS1638 Class 6, or higher
- Custom designed and ATEX compliant as required

Touch screen technology or data transfer

- Easy to operate
- Fast features selection and data transfer
- Open source data capture using CSV / XML files

Robust stainless steel frame design

- Corrosion and heat resistant
- Strength to weight advantage
- Designed to be fully portable with frame lifting pockets and eyes

Concept, design and complete!
