### AB-2000-SA

Suitable as a permanent cleaning station. Projectiles are loaded through the top tube and fired using a foot pedal or front firing. Can be used for extremely long hoses and tubes.

### AB-5000-SA

PLC controlled machine with pneumatic grippers for really large pipes. Used with a handset. Can be used for extremely long hoses and tubes. Projectiles are loaded through the top tube.

### AB-2500-APC

PLC controlled automatic station for companies with mass production of tubes and hoses. We build and equip the Jetcleaner 2500APC according to your specifications. Comes with a projectile feed, front firing system or a pistol.

### AB-JC-2010-PCU

Our fast-charged Jetcleaner Cobra rebuilt with confirmation system to verify the fired projectile. Automatic stop and control light indicates whether the projectile passed through the pipe or hose.
