

CONTROL C.2 TOUCH

The Control C.2 and new controller IPC with its intuitive operation for UNIFLEX crimpers, test benches and several more products has a colour touch display. The new menus (Quick-Start-Menu and Production Menu) as well as the possibility to individualise each and every menu and application will make your work much easier. Everything can be controlled via HID, i.e. via Windows devices. In addition, you can record, monitor and assure the quality of your product and how the machine works via the PFM option.

Control C.2

Production Features

Step by step crimping
Automatic downloadable crimping data and documentation (data logging)
Optional branded personalised step by step process for tailored operations
Seamless integration of hose labeling software and printing capabilities
Effortless label generation directly from the C.2 touch screen or mobile app
Enhanced production, quality and supervisor controls for comprehensive oversight
Integrated digital caliper and start/stop functionality for streamlined processes.
User friendly interface with customisable menus and compatibility with HID and Windows devices
Generation of colour-coded hose exchange dates and customer branding to enhance preventative maintenance and asset management

Service Features

Simple organisation of changes, maintenance and management of production data sets
Central order management from the desktop saves time and money.
Windows based

Upload and download data

Easy to use
HID-compliant devices eg external database, scanners, USB flash drive ect.

Suitable for:

Service Crimpers

HM200, SC 4 C.2, SH4 Ecoline, SC 6 (All models), SH 6 Ecoline, SH 6 S Ecoline, SH 10 C.2, SH 10 (All models), SC 12

Production Crimpers

HM 3 H, HM 222, HM 225, HM 375, HM 380, HM 400, HM 450, HM 480, HM 495, HM 660, HM 665, HM 1200,

The best return on Investment since 1972.

UNIFLEX ACCESSORIES

TU Table

Work Bench capable of supporting up to 800 kg
Put together your own individual press jaw deposit system.

- Creates order and clarity
- Expandable and future proof
- Stable and robust

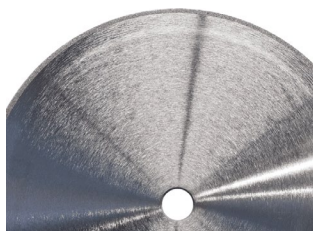

TU Rack

TU QDS - Die Storage system

- For PB 232 / 237 / 239 / 266 / 280 dies

Cutting Blades

TMC

Single blade - Cuts all hose types Easier and faster cuts. Lasts a minimum of 5 x longer than conventional blades.

TMG

Slitted - Blade to aid with cooling and cleaner cutting

ULS Ecoline

Uniflex labelling system. Benefits of labels and what they can tell the user:

- Which components need to be replaced
- The date of the exchange
- The potential hazards of the machine
- The plan for preventative maintenance
- Minimises cost of maintenance
- Avoids equipment failures and long downtime
- Publicity of your company

The best return on Investment since 1972.
