

UP 15 P

The UNIFLEX marking tool UP 10 Ecoline/UP 15 has a compact table construction. The European safety regulations DIN20066-2012-10, EN853, 854, 856, 857 stipulate that hose lines have to be marked indelibly with the manufacturer code, the assembling date and the max. pressure, e.g., XX_YY/MM_330 bar. This embossing will also allow you to indicate who produced the hose line and when. This is helpful information in the case of warranty claim. The new and compact UNIFLEX marking tool UP 10 Ecoline is a precise and easy-to-handle tool. The robust technology and low maintenance make it a perfect machine for mobile operations or workshops.

UP 15

Technical Data	UP 15P
Marking Area	11.5 - 90 mm
Marking Depth	0.5 mm
Insertable Steel Type	26 Pieces
Drive	Pneumatic 7 Bar (100 psi)
L x W x H	600 x 454 x 500 mm
